Roustan Refrigeration Unveils the Next Generation of Chillers for the World of Ice Rinks

Johnstown, PA – March 21, 2008 – Roustan Refrigeration, a division of The Roustan United Arena Solutions Team, creating refrigeration systems designed specifically for ice rinks since 1984, unveils its next generation chiller, the ***Arena Ice Master***.

"We have noticed a trend of increased use of comfort cooling refrigeration systems for ice rinks as a means of staying within budget ", said Scott Branovan, President and CEO of Roustan United Arena Solutions. "This solution is limiting as these styles of chillers can't perform efficiently or in certain applications. The ***Arena Ice Master*** is engineered for all ice types; from outdoor recreational venues to indoor, full size arenas, delivering quality ice each and every time, and providing a menu of options while maintaining the affordability of a comfort cooling system".

"These chillers are high performance systems that have been fine tuned and adjusted to produce quality ice, anywhere in the world and at any time of year", said Jack Hicks, who has been part of the Roustan Refrigeration design legacy of rink built chillers since 1993, and headed up the design and engineering team for ***Arena Ice Master*** along with Freeze Co Systems of Canada. "***Arena Ice Master*** Chillers can have a very low set point as opposed to comfort cooling systems. This is critical for making and maintaining quality ice, especially as we see the increased demand for seasonal outdoor ice rinks in warmer climates. The ***Arena Ice Master*** line of chillers offers not only customization based on venue size and location, but the owner can choose to have a user friendly micro processor control system and remote monitoring capabilities. ***Arena Ice Master*** Chillers employ environmentally friendly refrigerant options, choice of condenser types, various compressor sizes, in either split or packaged units."

About Roustan Refrigeration

Roustan Refrigeration is an original equipment manufacturer and a leading producer of both standard and customized ice rink designs, specializing in proprietary and energy saving refrigeration systems engineered specifically for ice rinks.

About The Roustan United Arena Solutions Team

The Roustan United Arena Solutions Team incorporates an extensive portfolio of divisions, and a team of representatives, dedicated to supporting the arena facility industry with products, service, and support to new and current rink owners and operators worldwide. W. Graeme Roustan, owner of Roustan United Arena Solutions, as was announced by Nike, Inc. on February 21, 2008, recently has become Chairman and part owner of Bauer Hockey.

About Freeze Co

Freeze Co is a manufacturer of industrial cooling systems which specializes in customization, focusing on customer needs to provide the right equipment with features that result in higher overall quality, more consistent performance, and system implementation flexibility.
